As you play, your memory of these rooms will return to you, and you must solve puzzles to make your way through. The more rooms you can successfully solve, the more challenges you will have to overcome. Your survival depends on being quick and observant, as your memory is your only defense. Will you get through the chambers in time? Can you overcome your fear and take the proper actions? Play to find out! With the upcoming launch of Alchemic's Murderous Mansion expansion, it's only a matter of time before gamers discover an all new genre of gaming! If you haven't played the original game, I highly recommend it. It's a great party game, but has been described as many other things such as a puzzle game, a memory game, or an action game. Well, we can certainly call this a puzzle game, but the game has much more to offer than that. Alchemic's Murderous Mansion is based on a Japanese horror story, and you play a person traveling through these chambers trying to get to the end of the story. If you're familiar with the story, you'll realize this game is a must have, as it really helps to enhance the experience. One of the great things about Murderous Mansion is that the game rewards you for playing carefully, making the game easy to pick up and play, but also challenging for those looking to get a little bit better. Here are some quick tips for the experienced gamers: Hold down the UP ARROW button while jumping, this will automatically send your character off the ground, and jump over all of the obstacles. This will save you some time, but the speed at which you can do this will determine the difficulty of the game. Press the Square ARROW button while jumping to open up a door. This is how you can get out of a room, but remember that you're still stuck in that room until you have finished it! Hold down the Triangle button to perform a "Double Jump" to reach higher places. You can use the D-Pad to switch weapons. Use the Left and Right D-Pad to switch between your Shotgun and your Grenade Launcher. The experience in this game is truly special. Murderous Mansion is a great game, and definitely one of the best and most unique puzzles available. In the years to come, we will be 82157476af
